

Changing the polarity on a Torbery Connector

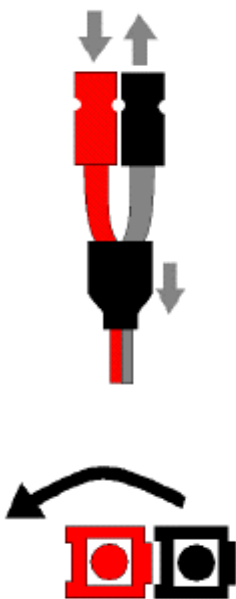

IMPORTANT

ALWAYS ensure that you connect 'red to red' and 'black to black'.

A wrong connection could damage the electronic components on your trolley and will invalidate the warranty.

If you need to change the polarity on of the connectors, please follow the instructions below:

- 1 Pull off the black plastic cover.
- 2 Push upwards on the black terminal and downwards on the red terminal. The terminals will separate.
- 3 Swap the black terminal to the other side of the red terminal
- 4 Slide the terminals together using the 'tongue and groove' fittings on the terminals.
- 5 Replace the black plastic cover.
