

Golf Trolley Workshop (Devon)

Grasshopper Golf Buggy Motor

With a general shortage of motors within the golf buggy industry, we have sourced a supply of units suitable for the Grasshopper, Patterson Highlander and Electrokart Heavy Duty.

These motors will fit the above later models with a split coupling. They have a "D" shaft at the top ready to accept a brake unit

We would suggest that these motors are fitted in pairs so as to avoid a mis-match of motor speed outputs.

Our Recommended Retail Price per unit

£325.00 + p&p
